everlasting beauty **TechniStone®**

WELCOME TO THE

TechniStone®

Synergy of nature, human ability and technology

Technologies push existing limits and continually stretch the bounds of the possible. There are unique materials and systems that seamlessly connect the life we have with something new, not yet known, and expand the horizons of human consciousness. **Even TechniStone® quartz has been created to make everyday home care easier and harness the beauty of stone that lasts for generations.**

This is the way Technistone continues on; produce and offer the best, take only what nature offers and treat it gently in something extraordinary. To show the world what man is capable to produce with the help of modern technologies; needs that bring the mutual understanding human ability and technologic development. **Thus a unique product is created, perfectly beautiful, surprisingly variable, technologically advanced and helpful.** Time is calling for progress and Technistone is moving ahead with the times. **Be progressive, you and your household will appreciate the smart touch of technology.**

Choose from the shades and types of TechniStone®, which carries the beauty of top-notch technology and understands your life needs and wishes. Each product carries something unique. Whether smooth or rough, soft shades or a striking pattern. All of them have one common element, wide variability of use, proven durability and stability. **These are what makes quartz a top-quality product for the generations of the third millennium.**

everlasting beauty

TechniStone®

TechniStone® MATERIAL

Technistone is a European manufacturer of **premium quality quartz, with a timeless design, outstanding performance and wide variability in use.** Thanks to its high hardness, easy maintenance, non-porous, non-toxic surface and high resistance to mechanical and chemical damage, it is sought after by customers around the world.

TechniStone® material combines the creativity of nature and the durability of modern materials. It is created by **processing selected high-quality natural raw materials (more than 90%) with the most modern production technologies.**

A wide range of color shades, patterns and finishes offer the use for interior and exterior projects. **TechniStone®** quartz is most commonly used for the production of **kitchen countertops, vanity tops, bars, tiles, stairs or interior decorations.**

A kitchen for the Beauty
of the open-air background!

Exterior
LIGHT GREY

EXTERIOR

Equip your outdoor patio kitchen with **TechniStone®** quartz and enjoy breakfast, lunch and dinner, beautiful and rainy days, alone or surrounded by your dearest ones right in the middle of your own backyard! For the surroundings of your home, create a cosy corner, **TechniStone®** materials will enhance the beauty of the entire garden and, will provide home and outdoor facilities for you for a long time. Exterior White, Exterior Grey, and Exterior Light Grey fit perfectly into the garden.

For designers and architects, designing commercial buildings, projects, or job specifications are a day-to-day activity. Whether the project is private or commercial, the quality of construction materials will be one of the most important selection criteria we are involved in. To this end the facade is undoubtedly an integral part that should be highly durable, easy to maintain, modern and technologically feasible. We bring three unique products from the **TechniStone® Exterior series; Exterior White, Exterior Light Grey and Exterior Beige**, which can be used in a polished or matt finish for facade panels and decorative elements of exterior surfaces.

Maintenance

Recommended maintenance and cleaning of outdoor kitchens are the same as those recommended for kitchen countertops in the interior. TechniStone® Exterior Materials - Facade tiles are non-porous and do not require special maintenance. They are resistant to weathering, frost and UV radiation. Common dirt (eg cement, dust) can be removed with a damp cloth. Unlike cement-based systems, TechniStone® Exterior large-format slabs - facade tiles can also be cleaned safely with pressurized water. If polluted by graffiti, use recommended abrasives and quartz cleaning products.

Warranty

The warranty must be activated by registering TechniStone® products on the company's website and commences at the installation date of the product in the exterior.

Outdoor kitchens

Technistone, a.s. provides a 5-year warranty for outdoor slabs from the Exterior product line for use in outdoor kitchens.

Facades

Technistone, a.s. provides a limited 10-year warranty that covers the specified physical and mechanical properties of TechniStone® Exterior facade tiles. The properties are guaranteed for 10 years from the date of the delivery of the facade tiles to the customer or his transporter.

The seller is obliged to present the customer with the right to claim, throughout the warranty period, that is, in accordance with the warranty terms of Technistone, a.s.

* After consultation with your fabricator.

You can find an edge treatment for outdoor kitchens in the Interior section of this book.

** Applies to selected products.

Recommended use and maintenance of the material

In order to safeguard the long-term gloss, it is not recommended to regularly cut food or other products directly on the surface. Heightened caution be observed while using special knives and sharp objects. Hot objects are not recommended to be placed directly on the surface without the use of an insulating pad. Hot iron/stainless steel utensils, cigarettes, lamps, etc. can cause significant material damage.

Proceed with caution when handling utensils and other metal objects especially on the edges or corners of the surface.

The stains caused by liquid substances (coffee, tea, oil, juice from fruits and vegetables, blood, kitchen cleaning agents etc.) should be removed by water as soon as possible or by the use one of the recommended cleaning agents if necessary. After using the cleaning agent, it must always be removed from the surface and washed thoroughly with water.

Avoid using of cleaning agents containing hydrochloric acid, phosphoric acid, sodium hydroxide, hydrogen peroxide and other cleaning additives can cause irreversible changes to the material's colour (Savo, drain cleaners, mold, grease and scale cleaners, etc.).

The material can be treated with common unconcentrated detergents. For repeated maintenance and cleaning it is recommended using the products of Technistone, a.s. (TS Protection, TS Orange Cleaner).

For more information about the maintenance and warranty of TechniStone® material, including a complete manual cleaning, visit www.technistone.com.

Warranty

Technistone, a.s. provides a 10-year warranty on slabs for interior use. The warranty must be activated by registering TechniStone® product on the company's website and commences at the installation date of the product in the interior of the living space. For more information, see the Warranty section of the Technistone website.
