Küppersbusch
FÜR KÜCHEN MIT STIL

**Dear customers, dear specialist dealers, dear employees and partners:
Welcome to our Küppersbusch catalogue 2019.**

In order to continually develop a traditional brand such as Küppersbusch and stay true to the brand's core philosophy, you need values. For us, these values are things such as first class design, perfect functionality and healthy cuisine. Values that define us as a brand and show what Küppersbusch stands for: "Küchen mit Stil" – our claim, which we use around the globe in German, thereby underlining our tradition and our roots.

The „German Brand Award 2017“ in Gold by the German Design Council proves that we must have done many things right over the many years we have been developing our brand. And that around the world: we are one of the premium brands in approximately 40 countries for equipping private and professional kitchens. Thanks to the supreme quality of our products, thanks to their timeless design and thanks to a range of products that goes far beyond providing mere kitchen appliances. For we also offer things that go beyond the "hardware" of a good kitchen: recipes, cookery courses and exchange with other people.

With this catalogue, we would like to introduce you to our concept and present our brand, the people behind it and our products.

Welcome to Küppersbusch!

KÜPPERSBUSCH:
IT IS THE INNER
VALUES THAT COUNT

**You want to cook easy, quick and delicious meals?
Küppersbusch is your brand!**

Since the brand was founded 140 years ago, **tradition** has been characterized by the perfect interplay of form and function. At Küppersbusch, the know-how for household appliances is based on the experiences gained in professional kitchens.

The perfectly aligned built-in appliances guarantee inspiring moments and more joy in the kitchen than ever before.

Perfect functions such as time-saving auto-programmes, intuitive controls, easy operation and optimised workflow processes guarantee a perfect end result.

At Küppersbusch, **tangible quality** means investing in sustainability: top quality materials, flawless workmanship, best customer service, reliability and longevity.

First class design with matching shapes and lines defines our award-winning products. With the Küppersbusch INDIVIDUAL Concept, you can adapt entire appliance series to your personal taste.

Healthy enjoyment is the result! Cutting-edge preparation methods – inspired by professional chefs: at Küppersbusch, we always look at cooking in a holistic way.

SEIT 1875.  GLÜCK AUF.

1875 Friedrich Küppersbusch founded the world's first stove factory "F. Küppersbusch & Söhne" in the Gelsenkirchen district of Schalke and launched his handcrafted coalburning stoves.

1880 Küppersbusch products went into series production with 12 employees, and the company expanded its product range.

1898 The automatic telephone exchange was patented. Küppersbusch had three telephone connections and communicated via a single telegram address.

1913 Küppersbusch became Europe's biggest specialist factory with 2,500 employees who produced 350 stoves and ovens a day.

1918 After the necessary switch to field kitchens and ovens during World War I, Küppersbusch began producing ovens for household use again. Due to the high demand, Küppersbusch switched to industrial manufacture.

1935 The plant experienced an explosion in demand and there was a constant increase in the number of employees. Küppersbusch opened a second production plant for coalburning stoves. In addition, this boom led to the acquisition of a second plant in Austria. Küppersbusch was once again a globally renowned company.

1954 The VW Beetle was not the only representative of the economic miracle. Küppersbusch adverts featured the high-speed hotplate, the seven-position switch and the indicator light.

1962 From the gas stove to the cooker hood to the fully enamelled fridge: what began with the oven had now developed into an entire product range.

1973 The 1970s: the built-in kitchen was welcomed into German households. Küppersbusch was one of the first producers to make this kitchen's built-in appliances.

1985 The birth year of the ökotherm®. A catalytic converter for ovens and cookers – ecology meets perfect food. The only one of its kind and only from Küppersbusch.

1993 Since 1993, Küppersbusch has been a successful participant in design competitions. Bundespreis, Red Dot Award, iF design award, Platinum Award for Design Excellence ADEX: to date, more than 60 products such as ovens, stoves, hobs and cooker hoods have been awarded both national and international prizes.

1999 In order to be able to serve the premium quality global kitchen segment, the Teka Group merged with Küppersbusch Hausgeräte GmbH and Küppersbusch Großküchentechnik GmbH & Co. KG. This company had more than 5,000 employees worldwide.

2008–2010 The design company from Gelsenkirchen launched the Platinum White Edition and the Black Chrome Edition and set new benchmarks on the built-in appliances market.

2013/2014 Küppersbusch presented the new "Individual" design concept. Even the first "Meisterstück" created a stir and impressively conveyed the company's brand values: design, quality, innovation, function and healthy food.

2015 Launching numerous innovations, the company celebrates its 140th anniversary at the international trade fair LivingKitchen in Cologne, Germany. In March, Küppersbusch is appointed founding member of the German Design Council.

2016 In September, the German Design Council accepts the Küppersbusch brand into its circle of "Major German Brands". The current edition of the Design Council's book "Distinctive. Ingenious." presents German businesses that have their own design and are strategic brand leaders on a global level.

2017 Küppersbusch is introducing the new appliance generation worldwide, placing increased focus on individual design flexibility with Mix+Match and the introduction of the new colour "Shade of Grey". In June 2017 we were awarded the German Brand Award in Gold by the German Design Council for a consistent brand introduction and sustainable market communication.

2018 Küppersbusch successfully participates in the jury of the Red Dot Design Award and receives two awards for the new oven series. Also new professional induction hobs are added to the range, which are operated via high-quality stainless steel knobs.

K-SERIES: PERFECT FUNCTIONS FOR FIRST CLASS RESULTS

Whether featuring classic operating functions, selectable by high-quality aluminium knobs or touch sensors - with Küppersbusch you always make the right choice. In addition, you can choose from a whole range of auto-programmes and special functions that you can save as favourites. Choose the appliances that best suit your needs from the various K-SERIES.

No matter which features you choose – you're sure to be delighted.

BRAND COMPETENCE AND OUTSTANDING DESIGN: KÜPPERSBUSCH

At Küppersbusch, design is more than a mere embellishment. It is a quality feature and represents the perfect interplay between form and function.

The result is experienced by our customers on a daily basis in their individual interaction with our products. And we experience it every time we receive yet another prize for our products.

The clear commitment to developing individual, sector-leading designs that have a special relevance and which can thrill people is reflected in the receipt of more than 70 national and international awards. It illustrates clearly that top-class design, as well as tangible quality, perfect function and healthy enjoyment are a fundamental mainstay for Küppersbusch.

For us it is always confirmation that our products not only appeal to users, but indeed provide them with joy each and every day. This refers not only to the individual design and the large design flexibility that we offer, but also the unique cooking and baking results that they experience with our equipment. There is no greater compliment for us, and it reinforces our constant orientation on the needs of our customers.

Our appliances are aimed at constantly surprising our customers positively, and giving them joy. All points of contact between the customer and the brand – from packaging to the website – have been designed with the greatest care and oriented on customer requirements, so that they reflect the passion and dedication with which we develop our products.

KÜPPERSBUSCH INDIVIDUAL

Nobody is like you. Always stay true to yourself, even in your kitchen, and adapt your Küppersbusch appliances to your preferences with the Individual Concept.

Individual + unique

Everyone likes different things. Different colours. Different fashions. Different music. The individuality, the uniqueness of personality is what makes every human being what he or she is.

The Küppersbusch Individual Concept offers you the opportunity to adapt our appliances to your personal preferences. For example, you can choose your appliance fronts to be black, white or grey.

For the design elements, you can choose between seven different colours and materials: Stainless Steel, Black Chrome, Silver Chrome, Gold, Black Velvet, Copper and Hot Chilli. Maximum variability, individual style.

Copper

Silver Chrome + Stone

Grey (Shade of Grey)

INDIVIDUAL PLUS

With Individual Plus Küppersbusch offers even more handles with different inlays or in bicolour.

10 further handle designs based on the Silver Chrome and Black Velvet handles can be used on the Küppersbusch appliances.

With the design kits featuring wood inserts, we use the exact same wood your kitchen furniture is made of.

For more information on how to order and receive INDIVIDUAL PLUS appliances, please turn to pages 74-75.

Black Chrome

SHADE OF GREY

STRIKING
UNOBTRUSIVE

Grey – more statement than colour – can be perfectly combined with all sorts of materials.

For our “Shade of Grey” appliance range, we have chosen a metallic mid-grey. A shade that underlines the quality of the materials used and gives prominence to the perfect technology hidden inside. At the same time, this grey, albeit sober, exudes plenty of warmth. For example in combination with concrete, stone and wood or together with the classic kitchen colour white. Or in a combination that reflects your own, personal style. “Shade of Grey” will always harmonise beautifully.

OUR QUALITY PROMISE

For more than 140 years, our products have been defined by tangible quality. To us, this means top-quality materials, supreme workmanship and longevity.

With this approach to quality, we have time and again developed kitchen appliances that set new standards in terms of their design, performance and function. Thanks to our quality management system in accordance with DIN ISO 9001, we can structure all our processes in such a way as to give our customers end-to-end quality assurance.

Tangible quality not only means that our appliances are reliable, but also our service.

Quality is of the utmost importance, especially in the area of customer service. On the one hand, we need to offer quick and individual help in case of questions and problems. We do this with professional technicians and with our guarantee that almost all spare parts are available for many years after you have bought the appliance. On the other hand, we receive unfiltered feedback on our appliances by maintaining a direct contact with our customers. This information is regularly passed on to the production and development departments. This way, every single customer interaction leads to a continuous improvement of quality.

Pancake test

Test kitchen

Electronics

Quality is our middle name. To this day, we have produced over 10 million ovens at our plants, and every new product benefits from this experience. And: we even have our very own quality lab. We test our appliances at this lab for as long as necessary to achieve first class results in every aspect. Here a few examples of our extensive range of tests.

The induction hob test and heat measurement: the lab tests the performance of the hob with a whole range of different pots and pans so that best results can be achieved with all the cookware on the market. The heating-up times, the flatness of the surfaces and the impermeability of the worktop are also tested extensively.

The electronics test: This test includes checking control precision, the heating-up times and heat distribution.

The pancake test: a uniform browning of the pancake tells us, that the heat distribution of the induction hobs is even and only given off where the pot or pan makes contact.

The taste test: at our in-house test kitchen, we conduct extensive baking and cooking experiments in order to optimise the taste of the meals you prepare. Our best-tasting test recipes are available on the Küppersbusch website.

Heat measurement

Oven production

HEALTHY ENJOYMENT WITH STEAM COOKING BY KÜPPERSBUSCH

If you enjoy healthy eating, you will love steaming your food, because minerals and important nutrients are largely preserved during steaming.

The Küppersbusch steam ovens will let you master this gentle method of cooking in next to no time. Our appliances work without pressure and with ideal steam distribution.

Why use steam? Because there simply is no gentler cooking method. Vegetables, fish and tender meat turn out perfectly thanks to the even distribution of heat. The colour and shape of the food remain unchanged, natural flavours and aromas are particularly intense. Nutrients and active ingredients are hardly leached out, and minerals remain almost completely intact.

In addition, steam cooking ensures there is no loss of moisture in your foods. And if you steam pre-cooked food, the moisture previously lost in the cooking or warming process is replaced. In short, steam cooking is a nutritionally valuable preparation method that has the added advantage of not requiring additional oils or fat and is essential for many special diets.

KÜPPERSBUSCH OVENS AND COMPACT APPLIANCES

In 1875 we placed our first oven on the market,
in our days the best one. Discover the new
ovens and compact appliances by Küppersbusch.
With plenty of innovative details that are sure
to arouse your passion for cooking.

Individual + intuitive

UNIQUE AND ONLY AT KÜPPERSBUSCH: THE CATALYTIC CONVERTER INSIDE YOUR OVEN

The unique ökotherm® catalytic converter inside your oven ensures purity and cleanliness right from the outset! Baking and cooking fumes in your kitchen will be a thing of the past.

The central element of the catalyst is the fan: it provides ideal air circulation and heat distribution inside the oven and thus ensures perfect cooking on multiple levels – without the flavour of one item being transferred to the other.

A neat solution! The air contaminated with grease, odours and particles inside the oven is sucked in by the fan (1). This then presses the air past the ring heater and into the catalytic converter (2). Here, all remains are transformed into water and carbonic acid. The cleaned air is then returned back into the oven (3). As a result, you will have no deposits inside the oven and no tedious cleaning will be necessary.

Energy-saving! The described process releases energy – this is returned to into the oven and reused to bake and cook. That saves energy!

Tasty! Baked goods stay especially moist and the natural aroma is preserved.

Fresh air! The air in your kitchen will be palpably fresher and less contaminated with grease.

Further information and function video at www.kueppersbusch.de

ENJOY YOUR MEAL – WE'LL DO THE CLEANING

Küppersbusch ovens feature cleaning systems that effectively eliminate the need for tedious scrubbing. And the enamelled interior is clean with just one wipe.

Thanks to our pyrolytic technology, arduous manual cleaning of the oven has finally become a thing of the past.

While you enjoy your meal, the oven takes care of any greasy spatters inside the oven all by itself. By heating the oven to 500°C, the self-cleaning system reduces all food residues to a fine ash. You can choose between 3 pyrolysis programmes – depending on the degree of dirt. Afterwards, all you need to do is wipe away the ash with a damp cloth, and the oven looks brand new again.

For the sake of the environment: use our perfect cleaning system with minimal energy consumption and without chemical detergents.

Simply place a glass of water in the oven and choose the ökoClean function (select models only).

The new Küppersbusch cleaning programme in conjunction with the ökoEmail+ interiors creates steam, which dissolves any grease and dirt that may have gathered on the oven walls and lets you wipe everything off with ease.

ökoEmail+: the extra smooth enamel surface by Küppersbusch.

Should a few spatters have hit the inside walls of your oven, you can simply wipe them off again with a damp cloth thanks to the exceptionally smooth enamel coating.

You want to gratinate or sear meat or fish without affecting the inside? Simply use our large **folding down grill**. It works especially well for flat steaks, spareribs, fish and toast. And in order to facilitate cleaning the oven ceiling after grilling, you can simply fold down the grill.

FOR MORE SAFETY AND COMFORT: OUR FULL GLASS INNER DOOR WITH SOFT-OPEN & CLOSE TECHNOLOGY

The **quality full glass inner door with quadruple glazing** is glued absolutely tightly to the underlying stainless steel frame – annoying screws are a thing of the past. And it not only looks good, but also has clear advantages.

Energy saving: the hot air largely remains inside the oven – that saves energy and money.

Easy cleaning: the oven doors are easy to unhinge, when the inside of the oven needs a clean. The glass remains clean between the panes, as the oven door is a closed system. The seamless stainless steel frame has no nooks and crannies where dirt can gather.

More safety: the doors are quadruple glazed and consequently extremely well insulated. This means that the outside of the oven hardly heats up.

Longevity: no fatigue of materials over the years, as we exclusively use quality materials such as stainless steel and glass.

Especially good when you sometimes have a hectic kitchen environment: the **Soft Open & Close function** of our appliance doors.

The Soft Open & Close technology ensures a gentle opening and closing of the doors thanks to a cushioning effect at either end.

That's good for the hinges and good for your nerves!

The XXL oven by Küppersbusch offers plenty of space. So don't hesitate to invite all your friends and relations.

With a capacity of 70 litres, you have plenty of space to bake and cook on 5 levels.

Good to know: the baking trays from the 60 cm ovens also fit the 45 cm compact ovens (except microwaves) and steam ovens by Küppersbusch!

Fully extendable brackets with PerfectStop:

The fully extendable brackets run incredibly smoothly and are at the same time very sturdy (withstand up to 22 kg). This way – even when baking heavy loads – you can push the trays backwards and forwards with ease. The PerfectStop latch function prevents trays from gliding back into the oven and allows you, for example, to turn and baste roasts in front of the oven.

Please note: should you clean your oven with the pyrolysis function (up to 500°C), please remove the side racks including telescopes beforehand as they will only withstand temperatures of up to 300°C.

MULTI STEAM

**MULTI
STEAM**

With the Küppersbusch ovens with steam function, you can choose to do pure steam cooking with 100% steam or use a combination of steam and hot air. So you can select the perfect setting for every dish you cook.

Steam cooking with 100% steam:

With steam temperatures between 30°C and 100°C this function is ideal for fish, vegetables, fruit, rice, potatoes or dumplings. Fish cooked at a temperature of approx. 70°C is a gourmet experience you should not miss out on! But also crème caramel and other delicate dishes are easy to pull off perfectly thanks to the exact and stable steam temperature.

Combination of steam and hot air

Combined steam cooking:

By mixing 50% steam with 50% hot air, you get the perfect climate for preparing custard royale, flans, puddings, juicy casseroles and for regenerating foods.

Vario steam cooking:

The combination of 25% steam and 75% hot air is ideal for baking bread and rolls and for cooking meat and poultry dishes.

COFFEE IN ITS MOST BEAUTIFUL FORM: PURE PLEASURE WITH KÜPPERSBUSCH

Coffee is one of the most popular drinks in the world. For centuries, people have succumbed to the temptation of its unique flavour and intense aroma. Coffee is also highly valued due to its invigorating effect.

The art of coffee making has long since become an expression of people's personal lifestyle. From the quick take-away cup down to the celebration of every single step of the brewing process with sophisticated coffee machines – over the past couple of decades, making coffee has become a significant part of our lives.

With our fully automated coffee machines, we at Küppersbusch not only offer perfect design and functionality, but also take into account your personal and individual preferences.

Our fully automated coffee machines will take coffee beans or coffee powder, and with its approx. 15 bar real milk function, it will produce a cappuccino or latte to die for. The coffee aroma is adjustable in 5 levels (from very mild to very strong), as is the coffee temperature (3 levels). With its intuitive LCD display, the machine is incredibly easy to use.

For more information on the fully automated coffee machines, please turn to page 41 and 51.

Ovens and compact appliances: Top functions for an appetising, healthy and modern diet

Küppersbusch ovens and compact appliances combine innovation, functionality and professional equipment with award-winning design quality. You can choose between 90-cm-wide maxi ovens and the standard 60 cm units. With the many feature and design options, you can give your personal taste free rein.

Individual (see page 12/13 and 74/75)

The Küppersbusch Individual concept offers the option of having all your appliances adapted to suit your personal taste. Depending on the model, there is a choice of white or black as a basic appliance colour. The fully individual look is achieved with one of the seven different design kits.

multitherm plus hot-air convection system

A ring heating element located in the back wall of the oven surrounds the fan and enables baking to be done on several levels without any of the food in the oven being tainted with the flavour or the aroma of other food.

ökotherm® oven catalytic converter (see page 24)

Baking and roasting produces grease, cooking odours and suspended matter which all soil the interior of the oven and leave behind ugly traces of grease. The oven fan forces air polluted with grease, odours and suspended matter through the catalytic converter. On doing so all of the undesirable substances are completely converted into water and carbon dioxide. This keeps the oven much cleaner and only clean air escapes from the oven.

Pyrolytic cleaning (see page 25)

Thanks to our pyrolysis technology, arduous manual cleaning of the oven has finally become a thing of the past. While you enjoy your meal, the oven takes care of any greasy spatters inside the oven all by itself. By heating the oven to 500°C, the self-cleaning system reduces all food residues to a fine ash. You can choose between 3 pyrolysis programmes – depending on the degree of dirt. Afterwards, all you need to do is wipe away the ash with a damp cloth, and the oven looks brand new again.

ökoClean (see page 25)

Our perfect cleaning system uses minimal energy and no chemical detergents. Simply place a glass of water in the oven and choose the ökoClean function.

ökoEmailPlus coating (see page 25)

Just like the baking trays, the entire interior of the oven is coated with a nonstick ökoEmailPlus enamel. The extremely smooth, pore-free surface of this enamel prevents fat and cooking residue from sticking to it. Laborious cleaning and aggressive, environmentally harmful cleaning agents are therefore a thing of the past. Just wiping out the oven with a damp cloth is generally all that is needed with ökoEmail / ökoEmail-Plus and the ökotherm® oven catalytic converter system to make the interior of the oven look like new again.

Quadruple glazing – Quadruple convenience: the oven door.

The full-glass inner door comprises a smooth surface without any indentations or crevices. This means that with just one wipe it will be sparkling clean again. The door can be easily removed – a host of advantages when it comes to cleaning.

Oven functions

With this number of oven functions, you are sure to find the right one for every taste and every dish.

Automatic programmes

With the huge range of automatic programmes, perfect results are guaranteed. Choose between pastries, fish, meat, vegetables and desserts, enter the weight and select the desired level of doneness. The oven will now determine a suitable baking mode and time. Press “Start”, and the oven will tell you, when you can serve your meal.

Favorite programmes

You can save the function settings for your preferred dishes in your favorite programmes. Just like you can save your favorite recipes in your favorites folder – including all the corresponding settings, of course! That way, whenever you choose to make a dish from your digital cookbook, you can be sure it will be perfect.

Soft Open & Close (see page 26)

Gentle and whisper-quiet opening and closing of your appliance door – thanks to the Soft Open & Soft Close technology.

Roasting thermometer

The cooking status, particularly for large joints, is not always easy to judge from the outside. Chefs de cuisine and hobby cooks therefore use a roasting thermometer which gives reliable information on the core temperature and hence on the cooking status of a roast. This means that you can roast a joint any way you want it – rare, medium or well done – at exactly the right temperature.

Drop-down large-area grill (see page 25)

The drop-down large-area grill makes it easier to clean the ceiling of the oven.

Energy efficiency class

In EU countries, a common energy labelling system provides a guide to how efficiently built-in electric ovens operate. The most economical appliances are categorised as Class A++ and the least economical as Class G. At Küppersbusch, a lot of research goes into ensuring that our appliances are amongst the most energy-efficient appliances on the market. Energy-saving features include our quadruple glazed oven door with heat-reflecting pure glass inner panes and our superior oven insulation. But also the oven light that can be switched off during use, the door contact switch and the consistent elimination of heat bridges guarantee an exemplary low energy consumption. Naturally, Küppersbusch appliances are among the most economical on the market.

Touch control

The touch of a fingertip is sufficient and the functions of the sensor buttons will be activated.

Turn knobs

If you prefer conventional operation, this product is the right choice. The operation is performed with the help of turn knobs.

Child safety lock

It is not possible to unintentionally switch on the oven when the child safety lock is activated.

Rapid heating

The rapid heating mode heats the oven up to the pre-set temperature in just half the time.

Cup illumination

Seeing is enjoying – a well-known fact. This is why LED lighting puts the perfect coffee you have made into just the right light. It presents a delicious crema beautifully and encourages turning coffee enjoyment into pure culture.

Halogen oven lighting

Two extra-bright halogen lights are installed at different heights on each side of the oven to provide optimum illumination of food in the oven.

Retro Clock function

The Retro Clock function is used to adapt the clock display of the electronic devices to the clock display of mechanical devices - for the perfect combination.

Door contact switch

The door contact switch is an energy-saving safety device. All of the heating elements and the hot-air fan are switched off if the door is opened during operation.

Eco mode

Eco mode is a display setting, which reduces the energy consumption of your display to a minimum.

Demo mode

The demo mode (also called dealer or exhibition mode) allows the appliances to be presented at an exhibition without heating up.

Stand-by Mode

The stand-by mode is an energy-saving setting used to switch the display off altogether.

Fresh water tank

Küppersbusch steam ovens / coffee machines can easily be integrated into any kitchen, as due to the fresh water tank no additional water supply is necessary.

Quick-start function

The microwave oven is automatically started when the start button is pressed, without any additional programme buttons having to be activated.

Inverter technology

The inverter technology is a system that keeps the power output constant even at a very low wattage (lower power settings). This guarantees that the energy is used in an optimal manner. With conventional technologies, the microwave always works with the entire available output and integrates shorter or longer break intervals depending on the power setting. This frequently leads to uneven warming and a higher expenditure of energy. In contrast to this, the inverter technology works with a consistently low energy supply so that in addition to savings, sensitive food can be heated, because the heat distribution in the cooked item is optimised.

Automatic defrost and weight function

The automatic defrost and weight function enables different kinds of food to be defrosted gently. Simply select the food category and enter the weight. Everything else will be taken care of by the automatic defrost system.

Regenerating

Dishes which have been prepared in advance can be heated up with a special combination of steam and hot air. There is no loss of quality or moisture and the food can be served as if freshly cooked at the exact time required.

Set & Go

With the Set & Go function you start the appliances with necessary settings with only one touch of the sensor field, any time later.

Heat & Hold

This setting enables you to programme the oven to automatically switch to the Keep warm setting after completion of baking or roasting. This option runs at 80° C for 30 minutes, after which the oven automatically switches itself off.

Electronic steam system

The steam is generated outside the oven in an external steam generator. This creates the right climate in a matter of seconds.

Multisteam (see page 29)

With the Küppersbusch ovens with steam function, you can choose to do pure STEAM COOKING with 100% steam – ideal for fish, vegetables and rice – or use a combination of steam and hot air. So you can select the perfect setting for every dish you cook. Casseroles, blancmanges or soufflés turn out best with the COMBINED STEAM COOKING function (50% steam and 50% hot air). Meanwhile, the VAR-IO STEAM COOKING function is ideal for baking bread and for cooking meat and poultry dishes (25% steam and 75% hot air).

Solo steam

If you want to enjoy the full benefits of steam cooking but already have a different oven, you can opt for the solo steam oven. This will enable you to heat up your oven exclusively with steam – ideal for making fish, rice and vegetable dishes.

Steam assist

If you do not need a steam oven but would nonetheless like to benefit from the power of steam, take a look at our ovens with steam assist function. Here, too, casseroles, blanchmanges or soufflés turn out best with the COMBINED STEAM COOKING function (50% steam and 50% hot air). Meanwhile, the VARIO STEAM COOKING function is ideal for baking bread and for cooking meat and poultry dishes (25% steam and 75% hot air).

Sous-Vide (see page 78)

Cook like a pro: sous-vide cooking involves creating and holding a constant temperature exclusively with the power of steam. This allows you to prepare dishes especially gently or to reheat pre-cooked and vacuum-packed dishes. Ideal in combination with the Küppersbusch vacuum drawer.

Steam cooking 30 – 100° C

With steam cooking, temperatures of between 30° C and 100° C can be selected in order to prepare any kind of food in the gentlest, most tasty manner. Fish cooked at a temperature of approx. 70° C has a taste which you shouldn't miss out on! But Crème Caramel and other delicate dishes are also easy to cook thanks to the fact that the steam temperature is maintained at an absolutely constant level.

Profi-Cooking Set

ZB 8030

consisting of: universal baking tray, inside roast and lid (illustration incl. cooking trivet ZB 1005). Perfect for preparing vegetables and fish: You can steam in the oven with the Profi-Cooking Set! The cover is made of silicone and glass and creates the closed space required for steaming. The cooking trivet can be used in different sizes.

Profi-Roaster Set

ZB 8031

consisting of:
cast aluminium pan (induction suitable)
and telescopic glide-out shelf (full glide-out).
Fits in all new Küppersbusch ovens. The cooking items are seared on the cast iron pan directly on an induction hob and can then be moved into the oven without rearranging it.

K-SERIES.7

Pure black design with touch control sensors and a high-quality LCD display with graphics and clear text.

K-SERIES.5

Elegant black, white or grey design with central TFT colour-display in a slim grey frame. Operation via backlit touch control sensors, supported by graphics and clear text in the display.

K-SERIES.3

Black design with central display. The slim grey frame also allows combination with K-SERIES.5 models. Electronic operation via high-quality aluminium rotary knobs is supported by the TFT colour-display.

K-SERIES.3

Black design, central timer with many additional functions, which makes a combination to the K-SERIES. 3 and K-SERIES. 5 models possible. Operation via high-quality aluminium rotary knobs.

K-SERIES.1

Completely black design, central timer with useful functions and control via rotary knobs.

KÜPPERSBUSCH K-SERIES.7

The Küppersbusch K-SERIES.7 impresses with its pure black design, intuitive menu navigation and allows the symmetrical combination of all devices of this series in horizontal and vertical arrangement.

Ovens, Cooker &
Compact appliances

K-SERIES.7

Operate your appliances via intuitive touch control

Oven functions

With the several oven functions you are sure to find the right one for every taste and every dish. The touch of a fingertip is sufficient and the functions of the sensor buttons will be activated.

Automatic programmes

With the huge range of automatic programmes, perfect results are guaranteed. Choose between pastries, fish, meat, vegetables and desserts, enter the weight and select the desired level of doneness. The oven will now determine a suitable baking mode and time. Press "Start", and the oven will tell you, when you can serve your meal.

Roasting thermometer

The cooking status, particularly for large joints, is not always easy to judge from the outside. Chefs de cuisine and hobby cooks therefore use a roasting thermometer which gives reliable information on the core temperature and hence on the cooking status of a roast. This means that you can roast a joint any way you want it – rare, medium or well done – at exactly the right temperature.

Favorite programmes

You can save the function settings for your preferred dishes in your favorite programmes. Just like you can save your favorite recipes in your favorites folder – including all the corresponding settings, of course! That way, whenever you choose to make a dish from your digital cookbook, you can be sure it will be perfect.

KÜPPERSBUSCH K-SERIES.3

The K-SERIES. 3 built-in appliances offer a high degree of comfort and practical features. Simple handling and functional clarity allow your passion for cooking all the freedom and meet your high expectations. The K-SERIES.3 can also be optimally combined with the K-SERIES.5 appliances.

Photo: rational einbauküchen GmbH

Ovens, Cooker &
Compact appliances

K-SERIES.3

If you prefer conventional handling, the K3 series is the right choice. All settings of the electronic TFT displays can be selected by using high-quality aluminum rotary knobs.

Oven functions

With the several oven functions you are sure to find the right one for every taste and every dish. By using the rotary knobs you can simply select the desired oven function and start the baking or cooking process.

Automatic programmes

With the huge range of automatic programmes, perfect results are guaranteed. Choose between pastries, fish, meat, vegetables and desserts, enter the weight and select the desired level of doneness. The oven will now determine a suitable baking mode and time. Press "Start", and the oven will tell you, when you can serve your meal.

Programm overview

After choosing one of the numerous automatic programs you can start the setting. The progress of the cooking process is shown on the appliance's display at any time.

KÜPPERSBUSCH DRAWERS AND MICROWAVES

The suitable heat and cooking drawer under the coffee machine, vacuum drawer and steam cooker becomes a sous-vide combination or the practical accessory drawer under the compact oven – Küppersbusch offers the suitable combination.

The warming drawer CSW 6800.0 (see page 80) is also suitable for cooking and warming food.

- 

Niche height
The niche height is the height of the required kitchen unit niche in cm.
- 

Niche width
The niche width is the width of the required kitchen unit niche in cm.
- 

Wall-hanging cabinet width
Wall-hanging cabinet width defines the wall-hanging cabinet required for installation in cm.
- 

Touch to open
Küppersbusch is following the trend and adapting it to built-in appliances with doors which open automatically with a light touch on the front.
- 

Touch control
The touch of a fingertip is sufficient and the functions of the sensor buttons will be activated.

- 

Turn knobs
If you prefer conventional operation, this product is the right choice. The operation is performed with the help of turn knobs.
- 

Automatic defrost and weight function
The automatic defrost and weight function enables different kinds of food to be defrosted gently. Simply select the food category and enter the weight. Everything else will be taken care of by the automatic defrost system.
- 

Child safety lock
It is not possible to unintentionally switch on the oven when the child safety lock is activated.
- 

Quick installation
This refers to convenience when installing built-in products. All of the installation components have been pre-assembled in the factory. Installation takes a matter of only five minutes!

SOUS-VIDE

UNPARALLELED CULINARY EXPERIENCES

Sous-vide cooking is a variant of low-temperature cooking performed in a bain marie or in steam at a practically constant temperature.

The sous-vide programme in Küppersbusch steam cookers and steam ovens is a feature especially designed for sous-vide cooking. With this method, meat, fish or vegetables are cooked inside a vacuum bag at relatively low temperatures below 100°C.

Discover unparalleled taste experiences with this cooking method. And this is how it works:

Simply clean and, where necessary, cut up the ingredients (raw and cooled) and put them in a vacuum bag. Add flavouring, e.g. oil, herbs and spices. Then, seal the bag in the vacuuming drawer to extract as much air as possible. If you do not intend to use them immediately, the bags need to be stored in a cool place. Vacuumed bags can be left in the fridge over night to marinate.

Then, place the bags into your steam cooker or steam oven and start the sous-vide programme. The food is cooked at a constant water or steam temperature of 50°C to 85°C.

The Küppersbusch vacuum drawer:

The new Küppersbusch vacuum drawer is perfect for sous-vide cooking (see picture on the left).

But it is also ideal for storing raw or already cooked foods. In this drawer, all the air is sucked from the vacuum bags, and they are sealed. The vacuum is effective at 99.9% and ensures foods keep fresh for a significantly longer time.

Food	not vacuum- sealed	vacuum-sealed
At room temperature		
Rolls	approx. 2-3 days	approx. 7-8 days
Coffee	approx. 2-3 months	approx. 12 months

KÜPPERSBUSCH HOBS

Hobs that inspire: from cutting-edge induction to award-winning gas hobs. We offer something for every taste, tailored to your personal needs.

Individual + versatile

ONE DEVICE – TWO USES

Küppersbusch induction hob-level extractor units are both cooking zone and extractor fan in one! This is an especially effective form of hob ventilation, as grease and steam are extracted directly at the source and are not carried through the room. The perfect solution for open living kitchens.

Another bonus is that you don't need a separate extractor fan above your cooker, meaning you have more freedom when designing your kitchen. You can even install your cooker below a window.

When using the hob-level extractor, you will need to insert the ventilation grid (provided). When you have finished using the extractor, you can close it again with its glass insert.

KMI 9800.0

In addition to the 90 and 80 cm long induction hob-level extractors KMI 9850, KMI 9800.0 and KMI 8500.0, Küppersbusch also provides the perfect solution for VarioLine:

The 14 cm wide hob-level extractor VKM 1800.0 can be installed between the VarioLine hobs VKI 3805.0 and VKIW 3800.0.

KMI 8500.0

VKI 3805.0 + VKM 1800.0 + VKIW 3800.0

KMI 8500.0

Ventilation grids in the individual concept.

Ventilation grid in the individual concept. Individualise your induction hob-level extractor. Fitting to the ovens, compact appliances, hoods, etc., designs in Stainless Steel, Black Chrome, Silver Chrome, Gold, Copper and Hot Chili are also possible as special orders (price and delivery time on request). The grids are not suitable for dishwashers.

Design Silver Chrome Acc. no. 99091

Design Hot Chili Acc. no. 99095

EFFECTIVE AND CLEAN

- **Quick cleaning** of the metal grease filter – simply lift it up and place it in your dishwasher.
- **Easy adjustment** of the self-explanatory ventilation controls, which are separate from the hob controls.
- **Easy installation** – one appliance, one cut into your work surface, one connection for two functions!
- **Low operating noise** thanks to the especially silent ventilation system inside the base.
- **Less soiling** - grease separation: 96,5%.

Hobs

Almost as hard as a diamond:

The surface of the Küppersbusch induction hob-level extractors KMI 9850.0 and KMI 9800.0 and the induction hobs KI 9850.0 and KI 8820.0 is refined with the SCHOTT CERAN® Miradur™ coating.

Through this patented, particularly resistant surface, the hob is permanently protected against scratches, because the surface hardness improved from 4 to approximately 10 on the Martens hardness scale when compared to conventional glass ceramic hobs.

SCHOTT CERAN® Miradur™ does not only reduce the signs of usage through cleaning and cooking, but rather it also guarantees that the hob looks like new for many years.

The metallic look for this surface gives the hob a fascinating look.

DESIGN AND FUNCTION

Hobs don't have to be black! At Küppersbusch, you are spoilt for choice: In addition to classic black hobs you can also get discreet grey ones or even pure white ones as well hobs with Miradur surface in Chrome-Look. Another question you will need to ask yourself is: what should the frame look like?

Stainless steel frame

Two elegant stainless steel brackets frame the hob from the front and back. With this type of frame, you can use the VarioLine connector bracket to combine several hob elements.

Bevelled edge

A bevelled glass edge frames the entire hob, giving it a sophisticated look. Without sharp edges or corners.

Flush installation

The hob is flush-mounted into your worktop, giving you a completely level surface. A great advantage here: the hob is incredibly easy to clean.

Black glass with Miradur™

Grey glass

White glass

SWIPE, TAP, TURN ...

The controls for Küppersbusch hobs are intuitive and easy-to-use. As with our new ovens and compact units, most of our hobs also have white controls.

knobControl

The settings of the power level are set by rotary knobs. Whether high-quality control elements made of stainless steel or aluminium, removable control knobs with integrated touch sensor or conventional rotary knobs - all settings can be selected intuitively. Depending on the model, further special functions can be activated by touch sensors.

glideControl+

Gently touch the glide control and select the cooking zone you need. By sliding your finger up and down on the respective graphic display, you can adjust the power level.

glideControl

When the hob is switched on, the electronic touch control appears. Once the cooking zone has been selected, the user can control the hob by sliding on the respective graphics.

selectControl

With the Küppersbusch selectControl display concept, all the controls are very clearly arranged. You select the cooking zone you need by tapping the respective cooking zone graphic. Then you set the power level with the + / - symbols. For special functions such as Memory, STOP-AND-GO etc., simply tap the direct selection buttons.

dialControl

This is an intuitive central control unit: first of all, you choose the cooking zone you need. Then, you set the power level by moving your finger clockwise on the control area.

THE PERFECT HOB FOR EVERYONE

Induction, gas or highlight hob?

At Küppersbusch, you will find the perfect model or indeed the perfect combination of appliances. There is one thing they all have in common: the energy-saving technology with innovative control concepts and a first class design.

Induction: quick, safe, economical and precise

Unlike any other type of energy, induction can be used at lightning speed, is finely adjustable, energy-saving and safe.

Highlight: classic and good

If you tend to let your experience guide you and prefer to go for the tried and tested, our ökospeed plus hobs are for you.

Gas: inspired by professional chefs

Not just professional chefs have the hots for cooking on gas. This economical and ecological energy is ideal for a modern kitchen.

At Küppersbusch, you will find attractive gas hobs stainless steel or elegant glass ceramic models.

Advantages of our gas hobs:

- **Easy to use** thanks to an integrated quick-response spark ignition with a press and turn control
- **Convenience** thanks to different burner sizes and different power levels
- **Easy cleaning** as the removable pan supports can be placed in the dishwasher (depends on model)
- **Safety** thanks to the automatic gas shutdown whenever a flame inadvertently extinguishes
- **Efficient and environmentally friendly**, because gas is a primary energy and does not emit any pollutants through transformation processes.

Küppersbusch VarioLine: This is like having a building set of different hob types, which also allows you to combine various widths with one another. Or you can integrate a lava stone grill, a wok hob or a hob-level extractor unit...

Hobs

HOW WIDE CAN AND SHOULD YOUR HOB BE?

Do you have any constraints regarding space in your kitchen? Or are you free to choose your dream size? With hob widths of **90 cm, 80 cm, 60 cm, 38 cm and 30 cm**, Küppersbusch gives you the flexibility you need – also for combining elements, as shown in the VarioLine example above.

New versatility in cooking: built-in electric hobs.

Independent hobs

Independent hobs have their own controls, for example sensor touch pads, and can be fitted into kitchens individually, irrespective of the oven.

Ceramic glass hobs

The robust ceramic glass hobs have a great deal of advantages: Thanks to their completely smooth surface pots and pans are particularly easy to handle. And because nothing burns on easily they can be cleaned with the flick of a wrist.

VarioLine

The Küppersbusch VarioLine series harmoniously combines diverse different hob sizes with stainless steel frame design.

Vario Induction

Pots of different sizes and particularly large roasters are no problem on Vario induction hobs. The cooking zones can be used as usual, and there is also the option of activating the two rectangular cooking zones together and setting them with a single control operation.

Induction

Many professional cooks swear by this form of cold energy. Induction can be used more precisely than any other kind of energy – it is extremely fast, can be controlled perfectly, saves energy and is safe. The secret of induction cooking: energy is only transmitted to where cookware with a ferrous base has been placed on a cooking zone. This generation of energy direct on the base of the pan ensures extremely short heating up times for food and low energy consumption. And since the cooking zone itself doesn't get hot, nothing can burn on.

Full-surface induction

Full-surface induction makes it possible to adapt the size of a cooking zone to your individual needs. The cooking zones are used like they usually are for small pots. For bigger pots or a roaster, each front cooking zone can be combined with the cooking zone behind it or all four cooking zones can be activated together as one large surface.

ökospeed plus

All of the Küppersbusch cooking zones have ökospeed plus elements. These sophisticated elements ensure that the heat-up time takes only a matter of seconds, resulting in a quick supply of heat. Thus besides heating up quickly, valuable energy is also saved.

Automatic booster cooking phase

Some of the cooking zones are equipped with an automatic booster, with which the setting for continuous cooking is stipulated on commencement of cooking. The cooking zone commences at full power and then automatically switches back to the setting for continuous cooking. You will find that cooking is taken care of for you.

Touch control

An exemplary electronics system controls the electric cooking zones. Touching the sensor pad lightly is sufficient to switch on the respective cooking zone. Besides operating the cooking settings, the easy-to-handle sensor pads are also used for controlling all other functions.

knobControl (see page 89)

The settings are set by using the knob. Depending on the model, additional special functions can be added by using sensor.

glideControl / glideControl+ (see page 89)

With the Küppersbusch operating concept, all functions such as activation of the timer function and multiple-circuit zones, which can be selected directly, are clearly arranged on the hob. A light touch on the relevant wedge-shaped control graphic selects the desired zone. Moving your finger up and down the graduated scale adjusts the power level.

selectControl (see page 89)

With the Küppersbusch selectControl display concept, all the controls are very clearly arranged. You select the cooking zone you need by tapping the respective cooking zone graphic. Then you set the power level with the + / – symbols. For special functions such as Memory, STOP-AND-GO etc., simply tap the direct selection buttons.

dialControl (see page 89)

The control unit of the Küppersbusch hobs has been optically and functionally optimised to improve user guidance. The cooking zones are set centrally with an intuitive control unit. First of all, the cooking zone of your choice is activated, and then the required power setting is made with a circling clockwise movement on the control unit.

Power booster setting

Küppersbusch induction hobs enable the power level of certain cooking zones to be raised by switching on the power booster setting, which means that heat required is available much more quickly.

öko-Power function

The öko-Power function allows the cooking zone output to be increased in two stages. The first stage is the öko-Power level, which increases the output but not as much as the boost level and therefore saves approximately 30 % energy. The second stage corresponds to the "normal" boost level, which provides heat very quickly when needed.

Residual heat indicator

The residual heat indicator reliably indicates which cooking zones are still hot. So you will not only know when to be careful, you can also use the residual heat to keep food warm and save energy at the same time.

STOP-AND-GO-Button

A STOP-AND-GO button makes for extremely convenient safety. With this button you will not be unpleasantly surprised when you unexpectedly need to answer the doorbell or the telephone, all it takes is a light touch on the STOP-AND-GO button and all of the activated cooking zones will be cut off at the setting that has been made. After your return all you need to do is press the button again to restart the process.

Pan and pan size detection

In the case of all induction cooking zones, in addition to the pan detection system there is also a system to detect the size of a pan. Sensors determine the size of the cookware so that when a pan is placed on a cooking zone the induction heating circuit reacts accordingly.

Minute minder

The minute minder buzzes when the time set has expired.

Automatic switch-off

The automatic switch-off system switches off the cooking zone when the time set in the minute minder has expired.

Switch-off memory

It's no problem if your hob is unintentionally switched off while it is operating. The electronic system remembers the most recent settings, so cooking can be resumed with the same settings when the hob is switched on again.

Central cut-off

The central cut-off system enables all of the cooking zones to be switched off simultaneously. So it doesn't matter which hand you use – if anything suddenly boils over you can switch off all of the cooking zones in a flash.

Childproof lock

It is not possible to unintentionally switch on the hob or turn up the setting when the child safety lock is activated.

Holiday shut-down

You no longer need to ask yourself if you have really switched off the hob after having left home. This is automatically taken care of by the holiday shutdown device. This safety device simply switches off the cooking zone if nothing is reset for some time.

Dual-circuit cooking zones

Various diameter dimensions can be used with these cooking zones, to optimize use of various sizes of cookware.

Dual-circuit cooking and roasting zone

A round cooking zone can be turned into a rectangular cooking zone when an additional heating element is switched on.

Bridging function

Full surface induction technology with its bridging function offers more space for large pots by coupling together 2 or 4 cooking zones.

Individual configuration of functions

The most popular functions can be individually saved on special key panels. Previously stored functions can be selected direct for use at any time.

Pre-definit special levels

Pre-set temperatures are automatically reached and maintained with the help of these special settings. This prevents liquids from boiling over and food in cooking pots from burning. Uses: 42°C melting level / 70°C keeping-warm level / 94°C pasta level.

Chef function

The chef function sub-divides the hob into 3 sections (left, centre, right). Individual power settings can be made for each section, and food is cooked by moving cookware to the other sections on the hob and not by changing power settings.

Cleaning function

The cleaning function switches the hob settings off for 20 seconds, during which time the cooking zones can be cleaned. After the 20 seconds have expired, the most recently set functions automatically start operating again.

Hob widths

The diverse widths of the Küppersbusch hobs mean flexibility all the way.

Pot move function

With the pot move function, the settings of two cooking zones can be changed easily. Cooking operations can therefore be moved from one cooking zone to another.

Especially for gas-hobs:

One-hand electric spark ignition

When the control knob is pressed in and turned, the electric one-hand spark ignition automatically produces an ignition spark and the relevant cooking zone is ignited.

Full safety device

The safety pilot automatically shuts off the gas when the flame goes out.

Pan supports

The pan supports, which rest lightly on the cooking zone, can simply be removed when required and are therefore easy to clean.

HOB. DOWNDRAFT. INDUCTION. K-SERIES . 8

Illustration with ventilation grid, Stainless steel frame

KMI 9850.0

Profi downdraft. knobControl. 13 power levels. 96,5% Grease deposit.

Features induction hob:

- 13-level power controls "knobControl" with **high-quality steel knobs** (including)
- 3 pre-defined special levels: melting level approx. 42°C, keeping-warm level approx. 70°C, pasta level approx. 94°C
- Switch-off memory
- Bridge function, front and rear cooking zone can be switched together to one cooking zone
- Automatic booster cooking phase
- Residual heat indicator
- Holiday shut-down device (limiting operation duration time)
- Ventilation grid and glass cover (ZK 8000) incl.
- 4 cooking zones 210 x 190 mm / 2,100 W (3,700 W*)

- 13-level power controls "glideControl+" with red display
- 3 pre-defined special levels: melting level approx. 42°C, keeping-warm level approx. 70°C, pasta level approx. 94°
- Bridge function, front and rear cooking zone can be switched together to one cooking zone
- Automatic booster cooking phase
- Residual heat indicator
- Minute minder with switch-off feature
- Holiday shut-down device (limiting operation duration time)
- Ventilation grid and glass cover (ZK 8000) incl.
- 4 cooking zones 210 x 190 mm / 2,100 W (3,700 W*)
- *with power booster setting

Features cooker hood:

- Extraction rate (to the outside) according to guideline EN 61591: max. normal power setting 530 m³/h, intensive power setting 620 m³/h
- Noise level according to guideline EN 60704-2-13: min. 45 dB, max. 55 dB, int. 68 dB
- 4 power levels incl. high power settings
- Digital display
- Metal grease filter with **96,5 % grease deposit**
- Automatic delay stop
- Recirculating air mode possible (see optional accessories)
- Exhaust air system incl. (see page 131)

Technical data:

- Electrical connection Induction 7,400 W / hood 115 W
- Air connection plinth fan Naber Compair Flow NW 150
- Appliance dimensions W x D approx. 898 x 518 mm
- Niche dimensions W x D approx. 860 x 500 mm
- For more information see page 203

Optional accessories (hood):

- PlasmaMade filter Acc. no. ZD 8001
- Charcoal filter box Acc. no. ZK 8001
- Glass cover Mirador Acc. no. ZK 8005
- Wireless window contact system Acc. no. ZK 8002
- For further optional accessories see page 128-131

For individual cooking enjoyment

Cooking has seldom been as enjoyable and as practical as it is today with our unique honeycomb hobs. An exceptional design and a high degree of flexibility mean the greatest possible individuality. Ideal hob design, optimal space utilisation and quick, easy cleaning are all combined. You have plenty of personal freedom when it comes to arranging the individual honeycombs. Simply put them together according to your own personal wishes.

HOBS. HONEYCOMB. INDUCTION.

EKWI 3740.0 W

Planning freedom. 11 power levels. 4 cooking zones.

Features:

- 11-level power controls with red display
 - 1 special level: keeping-warm level approx. 70°C
 - Switch-off memory
 - Automatic booster cooking phase
 - Residual heat indicator
 - Minute minder for up to 99 minutes with switch-off feature
 - Central switch-off control
 - Holiday shut-down device (limiting operation duration time)
 - 1 sensor touch honeycomb included
 - 4 separate cooking zones:
 - 2 x Ø 20 cm / 2,300 W (3,000 W*)
 - 2 x Ø 16 cm / 1,100 W (1,400 W*)
- * with power booster setting
- Optional accessories see page 128-129

Technical data:

- Electrical connection 7.4 kW
- Appliance dimensions W x D approx. 320 x 320 mm
- Installation depth 50 mm
- Niche dimensions see building-in diagrams
- For more information see page 203

Rekindle your desire for cooking with gas!

It is not only professional cooks who are on fire when it comes to cooking with gas. The energy, which is just as economical as it is ecological, is perfectly suited to modern kitchens. Gas ensures precise, quick cooking with exact and quick-reactive temperature controls. Pioneering design combined with the state-of-the-art technology of the glass ceramic gas hob. Professional and convenient controls are combined with the highest of safety standards. And, naturally, the lifelong experience of Küppersbusch in the professional catering equipment line of business also flows into all of the gas appliances. Whatever you decide on, you will certainly rediscover your passion for cooking.

KÜPPERSBUSCH VARIOLINE

Hobs reimagined. With the Küppersbusch VarioLine concept you create your individual space for cooking – with gas, induction, teppan yaki, wok, single or in combination – always perfectly matched.

Individuell + flexible

The VarioLine concept is ideal for those who prefer to put an individual menu together themselves. Top quality individual elements can be combined (using the metallic joining strip for VarioLine hobs acc. no. 1130, see page 129) to create a unique cooking and working area..

Induction, gas, lava stone grill or a combination of all of these – the possibilities are almost unlimited. The ultra-slim design of all the hob units is precisely matched, so that the different modules always result in a uniform and, more than anything else, extremely elegant combination.

VARIOLINE. HOB. DOWNDRAFT.

VARIOLINE. HOBS. GAS.

K - SERIES . 8

Stainless steel frame

GKS 3820.0

knobControl. 30 cm. 2 cooking zones.

Features:

- Variable power control "knobControl"
- Slimline burners
- Full safety device
- Variable settings
- Pan supports (cast iron)
- Burner cap (black enamelled)
- 1 high speed burner 3.0 kW
- 1 simmer burner 1.75 kW
- VarioLine metallic joining strip see optional accessories

Technical data:

- Gas connection 4.75 kW
- Electrical connection 0.1 kW
- Appliance dimensions W x D approx. 300 x 520 mm
- Installation depth 53 mm
- Niche dimensions W x D approx. 285 x 490 mm
- For more information see page 208

Optional accessories:

- VarioLine metallic joining strip Acc. no. 1130
- Gas deflector (see page 129) Acc. no ZK 8003 (for combination with VKM 1800.0)
- For further optional accessories see page 128-129

GKS 3820.0 ED

K - SERIES . 8

Stainless steel frame

GWS 3811.0

knobControl. 30 cm. 1 power wok burner.

Features:

- Variable power control "knobControl"
- Slimline burner
- Full safety device
- Variable settings
- Pan supports (cast iron)
- Burner cap (black enamelled)
- 1 wok burner 6.0 kW
- VarioLine metallic joining strip see optional accessories

Technical data:

- Gas connection 6.0 kW
- Electrical connection 0.1 kW
- Appliance dimensions W x D approx. 300 x 520 mm
- Installation depth 53 mm
- Niche dimensions W x D approx. 285 x 490 mm
- For more information see page 208

Optional accessories:

- VarioLine metallic joining strip Acc. no. 1130
- Gas deflector (see page 129) Acc. no ZK 8003 (for combination with VKM 1800.0)
- For further optional accessories see page 128-129

ADDITIONAL BUILDING-IN DIAGRAM AND ACCESSORIES. DOWNDRAFTS.

THE INTEGRATED SYSTEM

The deduction system can be integrated in the back of the bottom unit so that it is not visible to save on space. Depending on the model, the set contains flexible or rigid components and a powerful fan, which is installed in the base. KMI 9850.0, KMI 9800.0 and VKM 1800.0 contain components as shown a, b, d, e and f; KMI 8500 contains a, b, c, d and e.

INSTALLATION SCHEMATIC: EXHAUST DUCT

Installation variant: worktop deep 600 mm*

* only possible with flexible deduction system

KÜPPERSBUSCH COOKER HOODS

Goodbye cooking odours! Our cooker hoods provide you with a pleasant cooking atmosphere, avoiding greasy soiling and moisture damage. And they look really good.

Individual + efficient

Cooker hoods

BREATHTAKINGLY POWERFUL AND EFFICIENT

Küppersbusch cooker hoods are whisper-quiet, extremely powerful and at the same time exceptionally efficient.

They have an unusually low level of energy consumption, some models up to energy efficiency class A++. They also boast superb results when it comes to fan, grease filter and lighting efficiency.

Select Küppersbusch cooker hoods have a brush-less motor. Such a motor has a lower energy consumption than regular motors while providing the same output. Even when using the highest performance level, our cooker hoods are pleasantly quiet. Another bonus is the fact that our models are practically free from wear and tear, underlining the product value and explaining the longevity of the motor.

IMPRESSIVELY VERSATILE

The perfect model for every kitchen: the Küppersbusch range offers a multitude of styles, designs and functions.

Küppersbusch can offer you the perfect cooker hood for every kitchen and every taste. Whether you have an open plan kitchen or a separate one. At Küppersbusch – with our wall, island, head space, ceiling and module cooker hoods – you are spoilt for choice.

Depending on the design of your kitchen at home, you can choose between an exhaust air and a recirculation model.

Küppersbusch Individual: Even more versatility!

The Küppersbusch Individual Concept offers you the opportunity to adapt our appliances to your personal preferences. The cooker hoods are no exception: you can match them to the design kit you choose for your oven. Which-ever model you go for, each one impresses with its quality design, both individually and in combination with other appliances.

CEILING CANOPY HOOD WITH RECIRCULATION AIR BOX: THE ALTERNATIVE TO VENTILATION TO THE OUTSIDE.

Installation situation with a ceiling canopy hood and recirculation air box, accessory no. 9015

As part of energysaving when building or modernising houses, which is becoming increasingly important, circulating air boxes in a combination with a ceiling fan are an ideal alternative to ventilation to the outside. Drilling core holes for air outlets is a thing of the past, since the box is integrated in suspended kitchen ceilings (drywall construction) and connected to the cooker hood motor. Fumes generated during the cooking process are thus absorbed and the air, which is still warm but has been cleaned, is directed back into the kitchen.

EFFICIENT RIM SUCTION

Our cooker hoods with rim suction hide the grease filters behind a removable stainless steel cover. The intake area is deliberately reduced, causing the air to be sucked in at a significantly quicker rate than with a standard cooker hood. This results in an increased intake efficiency.

HOB AND EXTRACTOR HOOD IN ONE: THE HOB-LEVEL EXTRACTOR

The **induction hob-level extractor units** are both cooking zone and extractor fan in one! As grease and fumes are extracted directly at hob-level, they do not travel through the room, making for a significantly more pleasant climate in your kitchen. The perfect solution for open living kitchens.

Another bonus is that you don't need a separate extractor fan above your cooker, meaning you have more freedom when designing your kitchen. The installation is not only more flexible, but also simpler, because you only need to mount one appliance.

The ventilation system can be discretely hidden inside the base of your unit. This has the advantage that annoying operating sounds are reduced to a minimum.

>>> For more information on Küppersbusch hob-level extractor units, please refer to the chapter on hobs from page 84.

It's cooking fun!

Premium choice: recirculation or extraction

The sophisticated technology of Küppersbusch cooker hoods will freshen up your kitchen. In the recirculation mode, with which polluted air direct above the hob is filtered and cleaned and then returned to the kitchen atmosphere as clean air. Alternatively the extraction mode whereby the integrated motor directs cooking vapours into a central exhaust air chimney or to the outside.

Individual

The new Küppersbusch Individual concept offers the option of having some models adapted to suit your own personal taste by equipping them with additional design kits. A fully individual look is achieved with one of the different design kits available as an accessory.

Full power that can hardly be heard: fan technology

State-of-the art fan technology which works extremely powerfully and guarantees perfect extraction. And the systems are unusually quiet, even when operating at maximum extraction rates.

Clean work: metal grease filters

All of the Küppersbusch cooker hoods are fitted with a high-quality metal grease filter to extract the grease in the vapours. The recirculation mode requires a charcoal filter for removing odours. The metal filter can be easily removed and then simply cleaned in the dishwasher. And what's more: the grease saturation indicator in the cooker hood automatically shows when it is time to replace filters.

High-power setting

The high-power setting is for short-term operation in the case of intense cooking vapours. Depending on the model, the hoods switch back after a stipulated time to a pre-set standard mode.

Automatic delay stop

The automatic delay stop cleans the air after cooking too and switches off automatically after a certain period of time.

Lighting

It does not matter if you choose a standard, halogen or the new LED lighting your hob area is always ideally illuminated.

Illuminated controls

The illuminated control buttons are easy to read and use.

Quick installation

The new installation system of the built-in cooker hoods is easy and uncomplicated.

LED

These cooker hoods are equipped with modern, especially economical LED lights.

Suitable for the disabled

Thanks to a remote control, switching the cooker hoods on and operating them is simple for disabled people too.

Turn knobs

If you prefer conventional operation, this product is the right choice. The operation is performed with the help of turn knobs.

Touch control

The touch of a fingertip is sufficient and the functions of the sensor buttons will be activated.

Remote control

Controlling the cooker hood functions by means of remote control allows for more freedom of movement and easier accessibility.

Appliance width

This symbol indicates the width of the hood in cm.

Niche width

This symbol indicates the required niche or cut-out width for the top cabinet in cm.

Niche depth

This symbol indicates the required niche or cut-out depth for the top cabinet in cm.

Efficiency classes:

Energy

The energy efficiency rating is calculated from the annual energy consumption of the appliance and a standard energy consumption. This is based on the assumption of an average daily operating time of 60 minutes and a daily lighting time of 120 minutes.

Fan (fluid dynamic efficiency)

The fan efficiency is a measure of the amount of electrical energy used to transport outgoing air.

Lighting

In addition to energy consumption, the lighting efficiency also provides information on the durability of the light bulb.

Grease deposit level

The grease deposit level is the percentage of grease absorbed by the grease filters of a cooker hood.

Noise level

In accordance with EU standard EN 60704-2-13, the noise level stated has been measured at the maximum basic level.

COOKER HOOD. DOWNDRAFT. K - SERIES . 8

DD 9800.0

90 cm. Touch control. Rim suction technology.

Features:

- 4 power levels incl. high power setting
- Extraction rate (to the outside) according to guideline 2010/30/EU: max. normal power setting 581 m³/h, intensive power setting 669 m³/h
- Electronic control with touch control sensors
- Remote control included
- Digital display
- Motor-driven extendable cooker hood
- Rim suction technology with black glass panel
- Automatic delay stop
- Filter saturation indicator
- Worktop lighting (energy saving lamp 14 W)
- Metal grease filter
- Charcoal filter incl. (Acc. no. ZD 1008)

Technical data:

- Electrical connection 284 W
- Appliance dimensions W x H x D approx. 880 x 720-1,020 x 340 mm
- Niche dimensions W x D approx. 790 x 108 mm
- Exhaust air connection Ø 150 mm, Motor can be installed at the front or at the rear side
- For more information see page 210

Optional accessories:

- Replacement charcoal filter Acc. no. ZD 1008
- PlasmaMade filter Acc. no. ZD 8001 (see page 160/161)
- For further optional accessories see page 158-159

120 cm. Rim suction technology. Automatic delay stop.

Features:

- 8 power levels incl. high power settings
- Extraction rate (to the outside) according to guideline 2010/30/EU: max. normal power setting 631 m³/h, intensive power setting 807 m³/h
- Electronic control with remote control
- Remote control with LED power level indicator
- Filter saturation indicator
- Metal grease filter
- Recirculation air mode possible (see optional accessories)

Technical data:

- Electrical connection 292 W
- Appliance dimensions W x H x D approx. 1,200 x 310 x 600 mm
- Niche dimensions W x D approx. 1,180 x 580 mm
- Exhaust air connection Ø 150 mm, for installation in 5 directions
- LED light colour 3,500 Kelvin
- For more information see page 210

Optional accessories:

- Recirculation air mode outlet kit (incl. charcoal filter) Acc. no. 9015 (see page 159)
- Replacement charcoal filter Acc. no. 9021 for recirculation air mode kit
- PlasmaMade filter Acc. no. ZD 8001 (see page 160 / 161)
- For further optional accessories see page 158-159

PLASMA MADE

IDEAL CLIMATE FOR YOUR HEALTH

ARGUMENTS TO CONVINCE YOU

- Can be **simply installed later** on in almost any cooker hood suitable for circulation air.
- **Self-cleaning** filter **extremely low on maintenance**.
- **Maximum efficiency**.
- Audible **reduction in noise generation**.
- **Economical** in consumption.
- **Long life period**. A self-cleaning filter which will last you upto 15 years.
- **Completely natural**, converts any type of air pollution to clean air.
- **Certified technology**.

Model ZD 8000

Model ZD 8001

Combination of four techniques:

1. PlasmaMade Airfilter plasma technology:

The PlasmaMade plasma generator makes sure ionized plasma (O_3) is abstracted from the O_2 groups in the air. Besides, H_2O groups are split in a positive hydrogen ion and a negative oxygen ion, also referred to as ionization.

2. Fiberglass nano filter electrically charged:

The fiberglass mat makes sure that contaminations are caught in the Nano fiberglass filter. The Nano fiberglass filter is being electrostatically charged by the electrostatic filter.

3. Electrostatic filter, consisting of 2 metal cores:

The two electrostatic cores make sure that contaminations, contained in the Nano fiberglass mat by electrostatic discharge (also referred to as ESD), are eliminated.

4. Active carbon filter:

The carbon filter makes sure that any released O_3 (ozone) groups get caught, so only O_2 (oxygen), CO_2 (carbon dioxide) and H_2O (water) remain. The present OH groups abstract the hydrogen molecule (H) from the protection of the bacteria, deactivating smells, molds, bacteria, viruses, etc.

PLASMAMADE INSTALLATION FOR DIFFERENT TYPES OF COOKER

Island and chimney cooker hoods
ZD 8000 filter is mounted direct on the air vent.

Downdraft extractors
ZD 8001 filter is mounted in the base.

Hob with integrated cooktop extractor
ZD 8001 filter is mounted in the base.

Built-in ceiling canopy hoods
ZD 8000 filter is mounted direct on the cooker hood motor.

Built-in cooker hoods with ZD 8001
ZD 8001 filter is put onto the unit and connected to the hood.

Built-in cooker hoods with ZD 8000
ZD 8000 filter is put directly onto the motor of the hood.

KÜPPERSBUSCH COOLING APPLIANCES

You like fresh fruit, delicate meat, select wines?
Küppersbusch cooling appliances provide advanced
technology and intelligent cooling zones for optimal
storage of your food.

Individual + cool

FREE-STANDING FRIDGE-FREEZERS

For everyone who attaches importance to taste, aesthetics is here combined with the greatest gourmet indulgence. Made of high-quality stainless steel, they are not only an eye-catcher in your kitchen but also an impressive space-saver, in fact total Küppersbusch. For the loft generation, for passionate hosts, for showrooms or holiday bungalows: these fridge-freezers offer more than enough storage space for your big shopping trips.

Cool drinks at any time

With the Küppersbusch American-style fridge-freezers this is no longer a problem. The models have a modern refreshment centre for the preparation of ice cubes, crushed ice and ice-cool water.

Generous in space – economical in consumption

Powerful compressors and highly effective vacuum insulation reduce the consumption of electricity by up to 45 % less than the consumption of customary fridges and freezers. Rated energy efficiency min. A+ – and thus far more economical in terms of energy consumption than their American counterparts. Küppersbusch free-standing fridge-freezers all have very low vibration levels, making them especially quiet.

For every niche the suitable fridge ...

Due to their various niche-heights and furniture door fixing techniques, Küppersbusch cooling appliances can be integrated into any of the popular niches. The table below provides the relevant guide:

		FD	fixed furniture door system	page	SR	sliding-rail furniture door system	page
	Integrated built-in refrigerators and freezers 178 cm niche		FKF 8800.0i FK 8800.0i FG 8800.0i FKGF 8800.0i FKG 8850.0i FKG 8500.1	174 174 175 176 177 177		FK 8305.0i FKG 8310.0i FKG 8300.0i	175 178 178

	Built-under refrigerators 82 cm niche		FKU 1500.0i	184			

... with innovative interior designs!

Top Interior Design: The interior design of Küppersbusch cooling appliances appears at its best: the door compartments are made of high-grade plastic with chrome railings, combined with chrome trims. The safety-glass shelves in the inner compartment have a chrome trim at the front. In addition, the LED lighting provides outstanding energy-saving illumination (depending on model).

Anyone fancy a drink?

Individual

The Küppersbusch Individual concept offers the option of having some models adapted to suit your own personal taste by equipping them with additional design kits. A fully individual look is achieved with one of the seven different metal design trims available as an accessory.

Energy efficiency class

In EU countries there is a common energy labelling system, which provides a guide to the energy efficiency of domestic electric appliances. Under this system, the most economical appliances are categorised as Class A and the least economical as Class G. There is no doubt that Küppersbusch appliances are amongst the most energy-efficient on the market.

NoFrost technology

The NoFrost technology ensures the inside of your freezer will remain free from any build-up of ice. Frost has no chance of settling on the inner walls or on your food. The advantage is that you will never have to defrost your freezer and that it will always work as economically as possible.

FastCooling

Whenever you want to place a large number of warmer foods into your fridge – e.g. when you come back from your weekly shop – we recommend you activate the FastCooling function in order to speed up the cooling process for these products and to prevent food already inside your fridge from warming unnecessarily. The FastCooling function automatically switches off after about 6 hours.

FastFreezing

Whenever you freeze fresh food, you can simply lower the freezer temperature by pressing the FastFreezing button. After the initial freezing time is up, the freezer can be turned back to normal operation – either automatically or manually, depending on the model. The advantage of this method is: it is gentle on the goods you freeze, and the formation of an excess of ice crystals is prevented.

Touch control

A touch of a fingertip is sufficient and the function of the sensor buttons will be activated.

LED-Lighting

These fridges are equipped with economic interior LED lighting.

DefrostMode

The refrigerator no longer needs to be switched off for defrosting. This is carried out by DefrostMode at a constant temperature in the interior of the refrigerator. Food will not go off. The melted frost is simply transported to the back of the refrigerator, where it evaporates.

ökoFresh+

In this cooling zone with a temperature of nearly 0° C food can be kept fresh for up to three times longer than in a normal fridge section.

4-star freezer compartment

In the 4-star freezer compartment frozen food can be stored for a longer period at temperatures of up to –18° C.

4-star freezer section

A separate freezer section ensures temperatures of –18° C and below. Larger quantities of food can be frozen and stored for several months.

Climate classification

The climate classes indicate the ambient temperatures at which the cooling appliances optimally function.

Climate classification		Ambient temperature
„N“	Normal	+ 16° C to + 32° C
„SN“	Super normal	+ 10° C to + 32° C
„ST“	Sub-tropical	+ 18° C to + 38° C
„T“	Tropical	+ 18° C to + 43° C

VarioBoxes

The door compartments can be positioned at different heights. This way, it is easy to store unusually large food packages. Also, the compartments are easy to clean – simply take them out of the fridge and wash.

FreshBox

Fresh food should be stored in the especially devised drawers.

Holiday function

With this function, the appliance can be left untouched with the door closed for a longer period of time. The formation of mould and unpleasant odours inside the cooling chamber is prevented. When activating the holiday function, the fridge temperature will automatically be set to approx. 15°C. The freezer temperature will remain unchanged.

VarioShelves

The glass shelves can be slotted into the guide rails set into the walls of the fridge. You can change the distance between the shelves to suit your needs.

VarioShelves+

You can also slide the front halves of the glass shelves underneath the back halves.

MultiAirflow

The fridge is fitted with a function that causes food to cool down quickly and that ensures an even temperature throughout the inside of the fridge. Depending on the model, this function either cuts out automatically or at the push of a button. It is highly useful for restoring the temperature after the door has been opened or when the surrounding temperature is high. When this function is active, the temperature is practically the same throughout the entire fridge, meaning you can store your food on any shelf or in any drawer you please.

Electronic temperature control

With electronic temperature control, you can be confident that the temperature you set for your fridge or freezer is accurately maintained. A digital thermometer lets you know at a glance how cold it is.

Temperature warning system

An automatic warning system is activated if the temperature in the freezer compartment starts to rise. Depending on the model, a red warning lamp will light up and a loud audible alarm will sound to advise of the problem. The system is an excellent safeguard against spoiled food.

Child safety lock

Whenever the child safety lock is activated, you cannot change the settings of your appliance.

Softclose

Appliance doors with Softclose technology shut gently, quietly and practically of their own accord.

Magnetic locks

The refrigerator doors close very tightly as if by themselves thanks to magnetic locks, so there is no loss of cold or energy.

Fixed furniture door system

In the case of the fixed furniture door system the hinges of the refrigerator doors are attached to the refrigerator and the back of the kitchen furniture door.

Sliding-rail furniture door system

In the case of the sliding rail furniture door system the hinges of the furniture door are attached to the back of the latter and the inside of the furniture niche. A sliding rail on the front of the refrigerator attaches the door of the kitchen furniture to the refrigerator.

Niche height

The niche height corresponds to the height of the required kitchen unit niche.

Appliance width

The various widths of the Küppersbusch refrigerators and freezers mean flexibility all the way.

Electronic control by touch control sensors

Electronic control by push buttons

Mechanical control by rotary knob

FRESH. FRIDGE-FREEZER.

K - SERIES . 8

KEI 9750-0-2 T ****

Side-by-Side Fridge-freezer. NoFrost.

Features:

- Electronic temperature control with buttons
- Electronic temperature display
- Electronic refreshment centre
 - ice cubes, crushed ice, iced water
- Acoustic alarm
- VarioShelves
- VarioBoxes
- FreshBox
- Useable capacity 549 litres
 - of which
 - cooling section 379 litres
 - freezer section 170 litres
- Internal water filter with exchange indicator
- Water connection hose
- **Excluding handles (see optional acc.)**

Technical data:

- Energy consumption/year 450 kW/h
- Noise level 47 dB
- Freezing capacity 12 kg/24 h
- Storage time in the event of power failure 6 h
- Appliance dimensions (incl. handles)
 - W x H x D approx. 909 x 1,794 x 720 mm
- Niche dimensions
 - W x H x D approx. 915 x 1,780 x 632 mm
- Noise level 47 dB
- For more technical data see page 214

KÜPPERSBUSCH DISHWASHERS

Who does the dishes? Even the biggest pile of dishes will be no problem at all, thanks to the flexible options on the baskets and the optimal space utilisation. Looking forward to the next festive table.

Individual + brilliant

TIDY, PRACTICAL, FLEXIBLE. THE DISHWASHER BASKETS FOR OPTIMUM SPACE UTILISATION.

With Küppersbusch dishwashers, even the biggest pile of dishes will be no problem at all. Particularly flexible options on the baskets will help to ensure this. For example, with some of the models, the height of the top basket can easily be adjusted so that you can load the dishes just as you require. You will have enough space for pots and pans, if you fold down individual plate racks in the baskets. And the knife rack will securely accommodate long knives and cooking utensils.

SYSTEMATIC FLEXIBILITY

multiflex premium drawer II

(Acc. no. 1251, can be retrofitted)

The multiflex premium drawer II offers more convenience and flexibility. Cutlery, cooking utensils and espresso cups need no longer be placed in the main baskets thereby allowing more space for larger items.

Acc. no. 1251

Acc. no. 1251
with lowered
cutlery racks

multiflex profession baskets

Top basket

- Knife rack
- 6 collapsible plate racks
- 2 cup racks
- Basket handle with steel insert
(Central detergent tab receptacle)

Bottom basket

- 6 collapsible plate racks
- additional fold-away racks for cups or as a
support holder for 6 large glasses
- Cutlery basket
- Basket handle with steel insert

multiflex premium baskets

Top basket

- Knife rack
- 2 cup racks
- 2 collapsible plate racks
- Basket handle (Central detergent tab receptacle)

Bottom basket

- 4 collapsible plate racks
- Cutlery basket
- Basket handle

multiflex comfort baskets (standard baskets)

Top basket

- Knife rack (not for standard baskets)
- 2 collapsible plate racks (not in standard
baskets)
- 2 cup racks
- Central detergent tab receptacle

Bottom basket

- 2 collapsible plate racks
- Cutlery basket

Perfect performance down to the finest detail!

Noise level - quiet in operation

Küppersbusch dishwashers do not only excel because of their superb rinsing results, they are also extremely quiet in operation too. The noise level is indicated in accordance with the EU standard EN 60704-3 (re 1pw) in decibels (dB).

The large capacity dishwasher XXL

Also 60 cm wide, but up to an impressive 92,5 cm height, these large capacity models are ideal when you need to clean particularly large cookware.

express system

Rinse and dry twice as fast with the express system. Choose a programme and then press the express button. The rinsing time will immediately be shortened by up to 50 %. The shortened rinsing time will be shown in the remaining time display right away. Perfect rinsing results are guaranteed.

Half load option

Breakfast dishes can now be washed separately and more efficiently than by hand. Energy-saving and environmentfriendly.

Intensive zone

The new "intensive zone" function permits flexible mixed loading. Heavily soiled pots and pans in the lower basket, delicate crockery and glasses in the upper basket. Together in one washing process – clean and energy-saving.

Hygiene function

The new "hygiene extra" function is available as an option for improved hygienic cleaning performance. Cutting boards and baby feeding bottles are washed germfree.

aquasensor duo

The aquasensor makes sure that your dishwasher uses no more water than necessary. No more, and no less. A sensor checks the water for the tiniest particles of dirt. It tests the water at the end of the pre-rinse cycle to see if it can be reused for the main wash cycle. If the water is too dirty, fresh water is taken in. However, if the rinse water is clean enough, it will be reused and you will save on water.

Water safety system

Even if the system is switched off or in the event of a power failure, the water safety system protects the dishwasher reliably and safely against any damage caused by water.

aquatronic

The new, unique system of programme control is especially gentle on delicate glasses and will powerfully clean extremely soiled pots and pans by automatically adjusting the spray pressure during the wash programme. The fine sensors recognise how soiled dishes are. And depending on whether dishes are lightly, normally or heavily soiled, aquatronic will automatically regulate the spray pressure and set it at gentle, normal or powerful.

Info on Floor

Fully integrated automatic dishwashers equipped with the Info on Floor function make it possible to read the remaining operation time, the programme procedure and possible faults direct with the help of a light signal on the floor.

Beam on Floor

Fully integrated dishwashers do not inform you immediately on their operating status. With the "Beam on floor" signal – a red dot which is displayed on the floor – you will know

immediately whether the rinsing cycle has been completed or not. A blinking alarm signal will even indicate a fault.

Glass care system

Glasses can be adversely affected by the kind of water they come into contact with. The Küppersbusch glass care system not only adjusts the water hardness level, it also prevents thermal shock, which can occur if excessively hot water comes into contact with glass.

Tab detergent recognition

The automatic detergent recognition function adapts the washing cycles automatically to the type of detergent tablet being used, ensuring the best possible results.

Bright Light

The dishwashers are fitted with economical LED interior lighting, which is activated at the top of the door frame when the door is opened, thus illuminating the interior of the dishwasher in a pleasant blue light.

Heat exchanger

The heat exchanger dries the dishes without polluted air from the outside having to be used. Clouds of steam on opening the door at the end of the cycle are avoided. This saves energy, since it is used for the following rinse.

EcoDrying

EcoDrying improves the drying performance of dishwashers with a heat exchanger. The door automatically opens slightly when the programme has been completed. The unit is protected because most of the moisture evaporates and because temperatures are low when steam escapes. The Eco 50°C programme is backed up by EcoDrying as a standard.

Efficiency class

In EU countries there is a common energy labelling system, which provides a guide to the energy efficiency of domestic electric appliances. All dishwashers are classified according to energy consumption, and cleaning and drying performance into efficiency categories ranging from A+++ to D. A+++ is the most efficient category and D is the most uneconomical category. The challenge lies in using as little electricity and water as possible while at the same time achieving optimal rinsing results. Naturally all of our dishwashers are to be found in the A++ category, which means that they are among the most economical appliances on the market.

Appliance height

The various heights of the Küppersbusch dishwashers mean flexibility all the way.

Touch to open

Küppersbusch is following the trend and adapting it to cover fully integrated dishwashers with doors which open automatically with a light touch on the front of the dishwasher. The door can also be opened by touching the front lightly with your elbow or even your hip – which is most practical when you happen to have both hands full and wish to avoid fingerprints on the front of your kitchen unit.

FlexHinge

No matter how your kitchen looks like: long or extra thick furniture fronts, low plinths. The corresponding furniture front is fixed to the FlexHinge, thereby pushing the door up when opening and a bumping on the plinth is prevented.

CHALET VINEYARD EICHENSTEIN, MERANO

Eichenstein is a little patch of paradise, located in breathtaking surroundings in Montefranco above Merano at an altitude of 550 metres. Protected in the north by the towering mountain range Texel Group, it offers a wide view across the Adige Valley in the south, where wine thrives.

But not just wine thrives here, but mankind, too. The highlight on Eichenstein is the chalet, situated in a uniquely tranquil location at the heart of the vineyard. It boasts stylish furnishings, a breathtaking view over the Merano Adige Valley and the surrounding mountains, an infinity pool and peace, open landscape and wine-filled nature! A dream spot. The luxury chalet is exclusively equipped with Küppersbusch products – of course also with a wine fridge.

SHANGHAI FLAGSHIP STUDIO

On 30 May 2014, the two long-established German companies Poggenpohl and Küppersbusch opened their first joint studio in the Chinese metropolis Shanghai. Together with the well-known Chinese actress Angelababy, the managers welcomed the many high-ranking guests to the gala evening and presented an impressive kitchen showroom on an exhibition area of 2,800 sq m. An elaborate entertainment programme, an exclusive performance by Chinese singer Sunnan as well as many culinary delights prepared by Michelin-starred chef FranckElie Laloum from Paris made for a suitably glamorous evening.

Architecturally speaking, the studio is until today also a masterpiece. First-class design concepts and functional kitchen solutions in an extraordinary building make the new studio in Shanghai a genuine highlight – also for Küppersbusch. It is always an honour for us to be given the opportunity to present our innovative products in an equally innovative environment.

LIVING BELOW BEECH TREES: FRANKFURT

In 2016, on the outskirts of Frankfurt – on a park-like piece of land surrounded by old beech trees – a young family built their dream house in a contemporary style. The kitchen with open-plan dining area is the communicative heart of the house. Accessible from two sides, the kitchen and dining area can be opened up to or separated from the living-room with sliding doors.

With its handle-less design, the white kitchen fits in perfectly with the purist style of the house. For their built-in Küppersbusch appliances, they chose the Black Velvet line. And they decided to get everything you need for limitless kitchen fun – an oven, combined steam oven, automated coffee machine, compact TV above a 90-cm wide induction hob, integrated fridge and freezer plus dishwasher... But that's not all! As real wine connoisseurs, they also needed a wine fridge. So they chose to splash out on 5 Küppersbusch wine fridges, each with a capacity of 99 bottles, which are now located in their wine cellar.

RIVER CRUISE SHIPS, NETHERLANDS

AmaStella and AmaViola are certainly among the most modern river cruise ships in the world. This includes everything from the design of the ships themselves down to the offers below deck.

So, naturally, the restaurant menu is exquisite, too. Whether you go for a gourmet dinner with select wines or for a captain's dinner with just a few fellow diners – there is something for everyone. All kitchens on board are equipped with quality Küppersbusch appliances, which more than comply with the safety regulations for ships' kitchens. The heart of the two ships is the kitchen on the captain's deck. Here, a select number of lucky guests are invited to cook together and then join the captain for dinner. The kitchen experience alone is sure to be an unforgettable highlight, because the equipment and appliances on-board these ships are truly cutting-edge.

With the quality management system in accordance with DIN ISO 9001, Küppersbusch guarantees to provide its customers with quality and aims to deliver added value.

With its structured and straightforward processes as well as clearly defined responsibilities, the individually tailored quality management system for a holistic management is an important aspect of the company and focuses on customer satisfaction. For us, this DIN standard is also the foundation for a company that strives to learn and continually improve. We believe that sustainable development forms a sound basis for increasing customer satisfaction and securing our own future.

+ Awarded design

Over 60 design awards, 1 Iconic Award: Best of the Best 2017, 13 Red dot Awards over the last 5 years, 1 Best-of-the-Best Award in 2012, 1 Plus X Award in 2015, as well as 2 German Design Awards in 2016 and since 2015, member of the German Design Council.

+ Individual Concept

3 new series in 3 basic colours, 12 different handles and strips allow for maximum variability in your kitchen design. Individual + unique – to your personal preferences.

+ ökotherm[®] catalytic converter

Unique and only at Küppersbusch! The catalytic converter ensures the appliance stays clean on the inside, saves energy and optimises the cooking results.

+ Full glass inner door

The quality full glass inner door with quadruple glazing ensures perfect insulation. Clear advantages: Energy-saving, easy to clean, highest safety and longevity.

+ More than 140 years of experiences

Rooted in the Ruhr area since 1875: A region that – like no other – stands for reliability and down-to-earthness. Quality from tradition.

+ Full-range

A broad portfolio of products – covering everything from built-in ovens to sinks.
